

# WYNNMOTION

blind and awning  
**automation**

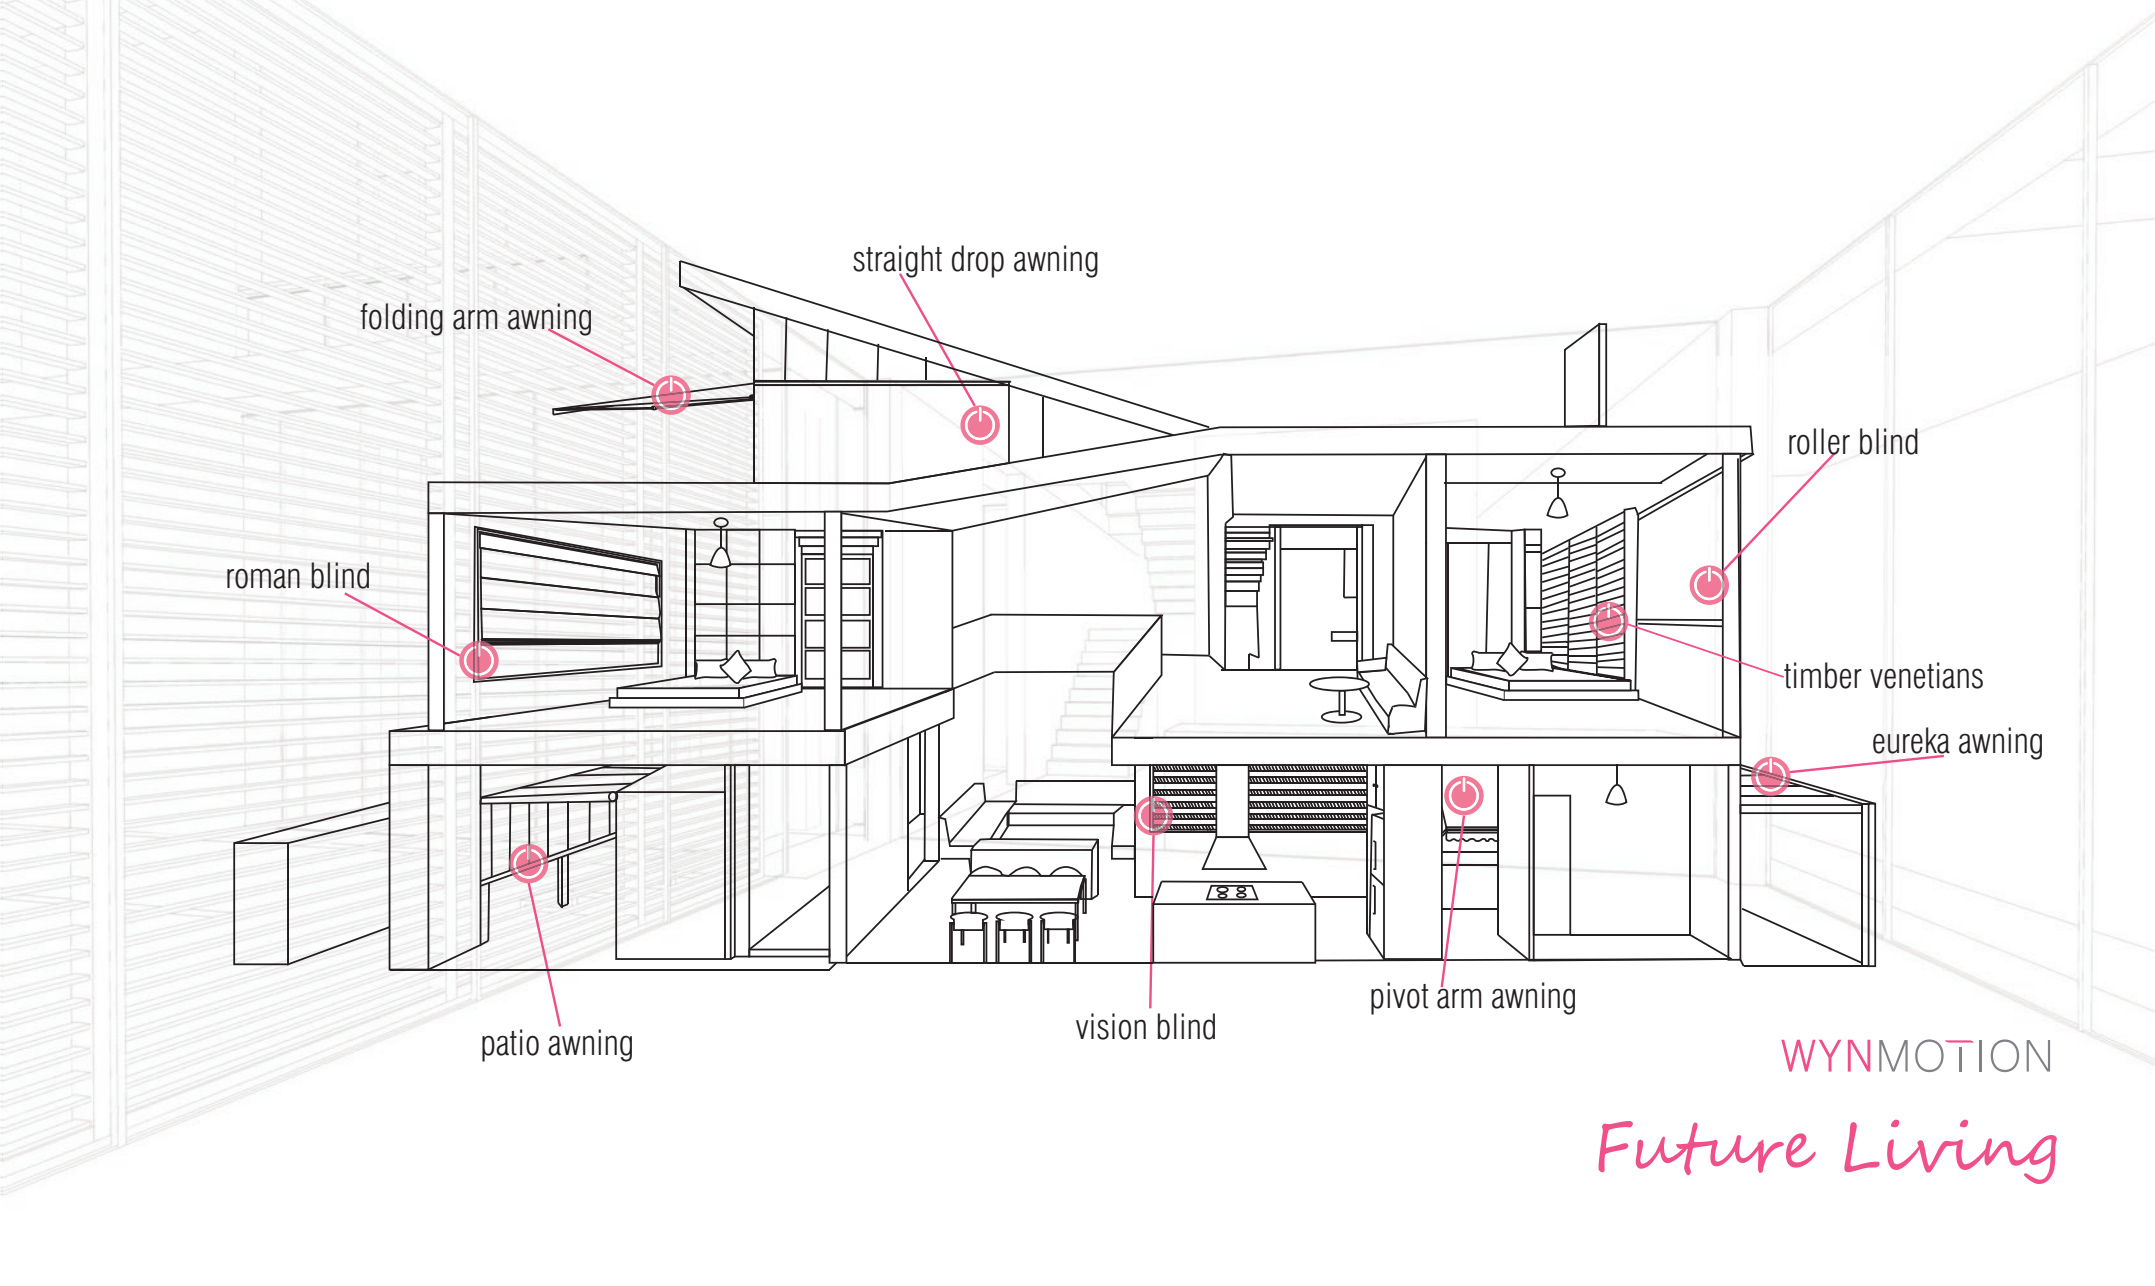

## Wyn-Wyn scenario

Congratulations for considering a Wynmotion automated window covering system by Wynstan. There's no time like the present to invest in future living.

Especially designed for a relaxed Australian lifestyle, Wynmotion motorised solutions means kissing cords and levers goodbye - and controlling your blinds and awnings at the touch of a button.

It's a hands-off approach that means the kids will no longer be tempted to get in a tangle, there's no back-wrenching cranking for you to do, and your windows enjoy a sleek, stylish motorised makeover.

Without the wear and tear of manual operation, blinds and awnings stay in better working order for longer. The more efficiently they work, the more you might save on heating and cooling bills.

## With Wynmotion your windows will never look back.

A Wynmotion window covering system is designed to add effortless luxury to your home - not just today - but all your tomorrows as well.

Each one of our unique motors is lovingly engineered, painstakingly tested, then rigorously checked and re-checked to make sure it lives up to our exacting standards and your high expectations.

You can be confident that once a Wynmotion system is in your home, it's there for the long haul - as the 5-year warranty on every one of our motors proudly guarantees.

If you can charge a phone, you can recharge our lithium motors.

While you may not have heard of a Lithium Rechargeable Motor before, they're as easy to operate as your mobile phone.

Made with roller blinds, roman blinds and vision blinds in mind, these motors are state-of-the-art designed and super simple to recharge. In fact, as simple as getting on the phone to us and ordering one today.

### 6M LONG CABLE RECHARGER

Reduces the need for extension cords to reach a power point.

### BATTERIES HIDDEN INSIDE THE MOTOR

No unsightly external battery packs.

### CAN BE INSTALLED IN MOST WINDOWS

Save on electrician costs.

### 200 CYCLES PER CHARGE

Only needs to be charged four times per year.\*

### QUICK CHARGE

Fully charged in three hours.

### RADIO CONTROLLED

Can be used with any Wynmotion remote.

### NO CORDS

100% child safe.

## Applied For

Roller Blind

Roman Blind

Vision Blind

## Mains Powered Motors - blindingly simple.

The main reason you'll love our Mains Powered Motors for blinds is how easy they are to set up and control.

Whether connected to home automation systems or used as remote motors, they're equally at home either way. To get one up and running in your home in no time at all, simply give us a call.

### Applied For

Roller Blind

Roman Blind

Vision Blind

Timber Venetian

### REMOTE OR HOME AUTOMATION

Can connect to any home.

### ENERGY EFFICIENT

Wynmotion sensors automatically control blinds and awnings to keep your home cooler in summer and warmer in winter.

### NEVER NEEDS RECHARGING

Once set up, you don't need to worry about it.

### RADIO CONTROLLED

Can be used with any Wynmotion remote.

### NO CORDS

100% child safe.

## Mains Powered Motors – awesome for awnings.

Traditional awnings are operated with an old-fashioned crank handle. Trudging around the house, laboriously opening and closing each one by hand is enough to make anyone cranky.

With the power to lift the largest in the Wynstan range, the raw power of Wymotion Mains Powered Motors is awe inspiring.

You can watch it all unfold at the touch of a button, and save all the strain on your arms and back.

## Sensor Available

Movement Sensor

Sun-Wind Sensor

## Applied For

Straight Drop Awning  
(self-tightening option)

Patio Awning

Pivot Arm Awning

Folding Arm Awning

Eureka Awning

### SELF TIGHTENING OPTION

Greater level of wind control for straight drop awnings.

## Control is in good hands: yours

The power to channel a Wynmotion system is in the palm of your hand. You can do it from the comfort of your bed, if you're that way inclined! Whatever your needs, we have all the remote possibilities covered.

### RANGE

200m outdoors\*

30m indoors\*

\*Site dependent

### Unique Code

Each motor has a unique code.

### WYNMOTION

### Full Range Control

Each Wynmotion remote can control any type of Wynmotion motor.

### Single Channel Remote

A single channel remote can control up to 20 motors around your house simultaneously. One click can have all the stored Wynmotion motors around your home opening and closing in perfect harmony.

### 5 Channel Remote with Timer

The 5-channel remote has a timer that allows you to pre-set the opening and closing of blinds and awnings. Wake up to sunshine streaming through the window, rather than fumbling around in the dark for your alarm snooze button.

### 15 Channel Remote

Our 15-channel remote allows you to control blinds and awnings around your home separately, simply by switching from one channel to another.

## Sensors that make perfect sense

Designed for the unpredictable Australian climate, Wynmotion sensors are clever enough to operate your blinds and awnings against changes in the weather.

Future living with Wynmotion isn't just about luxury, but also a sense of safety.

Automatic weather control for blinds and awnings.

### Movement Sensor

For premium protection against damage by high winds and the elements, our Movement Sensors immediately retract an awning when it's in danger of moving beyond its limit.

### Sun-wind Sensor

Our Sun-Wind sensors stay on constant alert outside your home. They open and close both internal and external blinds to best suit the temperature. When it gets too windy, they retract external awnings automatically.
