WHISPER[®] CELLULAR

SHADES

*Stylish, Versatile &
Energy Efficient.*

WHAT ARE

WHISPER® CELLULAR SHADES?

Whisper Cellular Shades Collection combines style, versatility and functionality to offer an innovative and energy efficient window covering solution to suit your home.

A variety of design options provide the ultimate in light and privacy control whilst slim line hardware minimises light gaps and maximises views.

Made from anti-static nonwoven polyester that aids in the resistance of dust, Whisper Cellular Fabrics are easy to clean and are available in a range of colours, cell sizes and opacities.

INNOVATIVE OPERATING OPTIONS

Versatile range of innovative lifting systems suitable for various window styles including skylights and shapes.

FLAWLESS STRUCTURE

Minimal light gaps delivered by the headrail design and maximised outside views with **slimline hardware** and minimal stack size.

UNIQUE CONSTRUCTION

Dust resistant fabrics provide easy maintenance and fabrics constructed with the unique **D-Cell design** ensures pleat retention.

FIRE SAFE

Cellular fabrics are fire retardant* so you can **enjoy total peace of mind.**

ORIGINAL DESIGN

No other cellular product on the market compares to the quality that Whisper Cellular Shades have perfected for over 30 years.

SOUND ABSORPTION

Perfect solution to **absorb sound** to quieten the home environment keeping exterior noise out.

INDOOR AIR QUALITY

For a fresh and healthy home, Whisper Cellular Fabrics have safe levels of Volatile Organic Compounds (VOCs). It is a smart choice for ensuring **optimal air quality.**

PLEAT RETENTION WITH D-CELL

D-Cell ensures your cellular **pleat never falls out**, so you have a perfect pleat for years.

CELLULAR SHADES OFFER SUPERIOR ENERGY EFFICIENCY

Want to save up to **32%***
on your heating costs?

Whisper Cellular Shades are designed with a unique honeycomb cell shape that creates pockets of energy-saving insulation. The cell construction traps air and makes it more difficult for heat to transfer in and out of the window, improving energy efficiency and reducing your heating and cooling costs in both Winter and Summer.

R-value is a measure of a product's ability to resist heat flow, which is especially important in the cool winter months, when a significant amount of a home's heat is lost through the windows. The higher the R-value, the more insulation a product provides and the better it is at reducing heat loss.

PRODUCT	R-VALUES**
10mm Sabelle & Daybreak Translucent	0.31
20mm Sabelle, Daybreak & Sunterra Translucent	0.33
20mm Millenia Translucent	0.33
20mm Millenia Blockout	0.33
10mm Dusk Blockout	0.50
20mm Sabelle, Daybreak & Sunterra Blockout	0.53
35 Insulated Roof Panel	1.05
65mm Pink Batt	1.50

**The R-Values are the combined measurement of 3mm (one-eighth inch) Cl glass (R=0.127) plus window covering and are reported in metric SI units. Thermal properties are determined by a certified third party laboratory utilising accepted ASTM, NFRC and WES standards and procedures. Measurement may vary based on window type and method of installation.

Whisper Cellular Shades Collection offers you the ability to reduce heat through your windows in both Winter and Summer.

HARDWARE:

DESIGN OPTIONS

Cellular Shades feature sophisticated design options providing complete control in light and privacy. The options available depend on which operating system you have selected.

Bottom-Up

Available with:

- CordLock
- CordLoop
- CordLess
- Motorised
- Skylight

Top-Down

Available with:

- CordLock

Top-Down/Bottom-Up

Available with:

- CordLock
- CordLoop
- CordLess

Duo-Lite

Available with:

- CordLock
- CordLoop
- CordLess

Bottom-Up

Shade raises from the bottom.

Duo-Lite

One shade combining two fabric opacities.

Top-Down/ Bottom-Up

Shade can be adjusted from both top and bottom.

Top-Down

Shade lowers from the top.

Shapes

Cellular fabrics can cover virtually any shape of window.

Skylights

Ideal for windows on sloping walls or hard-to-reach windows.

HARDWARE:

OPERATING OPTIONS

Cellular Shades are compatible with most windows and offer a variety of innovative operating systems, with child-safe options for total peace of mind.

CordLock

- Slimline headrail
- Available with all design options

CordLoop

- Light and smooth handling for larger blinds
- Spring loaded cord tensioner keeping cords neatly out of the way
- Child safe as prevents hazards from loose cords

CordLess

- Ultimate choice for Child Safety
- Easy & smooth handling
- Clean, modern look with no cords

Motorised

- Ultimate choice for Child Safety
- Can operate larger spanning blinds
- Clean, modern look with no cords

Motorised

Effortless operation at the press of a button.

CordLock

Easy operation provided by the traditional cord lock system.

CordLess

Cordless lifting system for raising and lowering at the touch of a finger.

CordLoop

Continuous cord loop system to raise or lower larger shades.

POWER SUPPLY & CONTROL OPTIONS

Shades can be powered by a battery wand with AA batteries or with a DC power Supply.

The system offers built in receiver in the headrail that allows control with a remote and the ability to operate multiple shades at once.

Like the remote, a wireless wall switch is an alternative control solution. It's powered by AA batteries and mounted to a nearby wall.

The shades can also be used with home automation with the addition of a connection interface per shade.

CELL SIZE OPTIONS

20mm Cell Size

The larger cell size can be used for all types of windows - large, small, wide and narrow. The 20mm cell size looks particularly elegant over large window spaces.

10mm Cell Size

The smaller cell size is typically great for small windows with the pleats looking proportionate to the window size making a defined classic style on a smaller scale.

10mm

20mm

OPACITY: CONTROL LIGHT

& PRIVACY WITH EASE

Blockout

Blockout fabrics offer the ultimate in privacy, both day and night. Open to allow sunlight in, close to enjoy total darkness.

Translucent

Translucent fabrics offer complete day time privacy while still allowing natural light to filter into the room.

Sheer

Sheer fabrics provide great day time visibility so you can still enjoy the outside view whilst diffusing the harsh outside light.

Translucent

CARE & CLEANING

Whisper Cellular Shades are easy to clean and are designed to be dust resistant.

General Care (GC)

Dust with a feather duster, compressed air or a hair dryer set on cool.

Vacuum (VC)

Gently vacuum with a brush attachment.

Spot Clean (SC)

Using warm water and mild detergent, dampen a clean white cloth and gently dab the spot on the fabric only.

Note: Rubbing can damage fabrics. Do not spot clean the valance.

UltraSonic (US)

Professional ultrasonic cleaning services are an effective means of cleaning translucent fabrics only.

Bathtub (BT)

1. Fill a tub with warm water and mild detergent.
2. Open the shade and immerse the fabric of the shade into the water, do not submerge the headrail.
3. Rinse with clean water.
4. Fully close the shade and tilt it to allow excess water to drain off.
5. Reinstall the damp shade, lower it and let it dry completely.
