

HONEYCOMB
WHISPER CELLULAR

PERFECT FOR ANY WINDOW

Suitable for windows of all shapes and sizes, Whisper Cellular Shades are advanced pleated blinds that feature a unique cellular structure resembling honeycomb. Air passing through the blinds gets trapped in the structure, assisting in noise reduction and aiding in energy efficiency. Whisper Cellular Shades are also one of the few window coverings available which can be specifically designed to cover skylights.

TECHNICAL INFORMATION

Color and fabric

Sizing

Multiple size options are available for the Whisper Cellular Shade. - 3/4", 3/8", 9/16"

You can also select double cell size for more energy efficiency and Grant pleat size for large windows

Skylights

The Cellular Shades are one of the few products that work effectively in a skylight, to either block out or filter light entering the room.

Flexibility

The Whisper Cellular operating system gives you flexibility on light and privacy options. On a Top Down Bottom Up (TDBU) option, you can bring the top down while having the bottom fully closed – see main image on front page.

Duo-Lite shade option

This option allows for ultimate versatility in light and privacy control by making use of both light filtering and blackout fabrics. It is similar to the TDBU option, but rather than resulting in empty space when the top is down, a light-filtering fabric is exposed.
