

WHISPER CELLULAR ENERGY EFFICIENCY

Tested and Proven

Whisper Cellular Shades have been tested and proven to help reduce the cost of heating a home.

Enjoy warmer winters & cooler summers as Whisper Cellular shades slows down heat transfer through the window for year round comfort.

R-Values

R-value is a measure of a product's ability to resist heat flow.

The higher the R-value, the more insulation a product provides and the better it is at reducing heat loss.

Medium

Up to 17% in energy savings* with Sabelle $25/64$ " single cell translucent fabric

High

Up to 26% in energy savings* with any Whisper $25/32$ " single cell or Indiana double cell translucent fabric

Very High

Up to 28% in energy savings* with Sabelle $25/64$ " single cell blackout fabric

Excellent

Up to 32% in energy savings* with any Whisper $25/32$ " single cell blackout fabric

Sabelle $25/64$ " single cell translucent fabric

Sabelle $25/32$ " single cell translucent fabric

Sabelle $25/64$ " single cell blackout fabric

Sabelle $25/32$ " single cell blackout fabric

*Savings are based on the installation of fully-recessed, reveal-mounted Arena fabric as specified above in an average home in Sydney, compared with the House Energy Rating standard of Holland Blinds from AccuRate, in that home. These calculations have been modelled by an independent third party. Savings will vary based on window type and installation

WHISPER CELLULAR CARE & CLEAN

General Care**

Dust with a feather duster, compressed air, or a hair dryer set on cool.

Vacuum

Gently vacuum with a brush attachment.

Spot Clean

Using warm water and mild detergent, dampen a clean white cloth and gently dab the spot on the fabric only. Note: Rubbing can damage fabrics. Do not spot clean the valance.

UltraSonic

Professional ultrasonic cleaning services are an effective means of cleaning translucent fabrics only.

Bathtub

- Fill a tub with warm water and mild detergent.
- Open the shade and immerse the fabric of the shade into the water, do not submerge the headrail.
- Rinse with clean water.
- Fully close the shade and tilt it to allow excess water to drain off.
- Reinstall the damp shade, lower it and let it dry completely.
