## WYNSTAN STRAIGHT DROP AWNING SERIES

---

The Wynstan designed and engineered Straight Drop Awning series has been developed to suit all exterior buildings. The series of four awning styles utilise common hardware for a consistent look across the range. Given this, you can personalize the perfect awning to suit your requirements.

# 4 AWNING STYLES

## Straight Drop Awning

This is a traditional style awning that has been given a clean modern look. Simple to operate and ideal for spaces where guide channels are not suitable, the awning can easily be strapped down to a railing or directly to the floor.

## Cable Guide

This robust system not only provides UV protection and air flow, it is incredibly durable and provides the best option when fixing a channel to a wall is not possible. Featuring stainless steel cables perfect for seaside homes. The bottom rail moves up and down the cable guides creating a smooth operation.

## Zip Style

The Zip Style awning will not only create an extra outdoor room but protect you from the harsh UV and ensure insects don't enter, thanks to the fabric running within the side channels. Ideal for moderate to windy conditions, as the fabric resists blowing out of the channels due to the hidden zip side channels providing protection from strong wind gusts. Consider the Zip Style if you have a courtyard or patio.

## Pivot Arm

Projecting the fabric off the window via a set of arms, the Wynstan Pivot allows sun to be controlled through the angle or pitch, and allows for airflow underneath as the awning is not fitted directly to the window. Windows can remain open when the awning is in use and this awning is suitable for small or large windows.

## WYNSTAN STRAIGHT DROP AWNINGS PROVEN TO REDUCE COOLING ENERGY COSTS BY UP TO 44%:

Our Awnings have been independently tested & proven to significantly reduce cooling energy costs by keeping a standard\* home at a consistent & comfortable temperature throughout the summer months.

\*Results based on a single storey, brick veneer home on a concrete slab using ducted air-conditioning and equally distributed windows with Wynstan Awnings installed with Canvas fabric. Based on independent modelling conducted by White Box Technologies in conjunction with Peter Lyons & Associates June 2013.

**Pearl White**

## HEADBOX OPTIONS

### Closed Headbox

Contemporary, clean lines of the headbox encapsulates the fabric and protects it from external elements such as rain and UV rays which assists in keeping the fabric clean and enhances longevity.

### Open Headbox

Offers increased air circulation around the roller thereby minimising heat build-up. This headbox is standard with Wynstan Pivot Arm Awning.

### Open Roller

A simple design gives you a great look and offers an ideal choice for a more economical cost.
